

# Subject index to Volume 23

## A

- A7r5 and DDT1 MF-2 smooth muscle cells, agonist-induced down-regulation of type 1 and type 3 inositol 1,4,5-trisphosphate receptors in, 11
- Acinar cells (rabbit parotid), cGMP production is coupled to  $\text{Ca}^{2+}$ -dependent nitric oxide generation in, 405
- Adenylate cyclase-activating (pituitary) polypeptides 38 and 27 increase cytosolic free  $\text{Ca}^{2+}$  concentration in porcine somatotropes through common and distinct mechanisms, 369
- Adrenal chromaffin (bovine) cells, histamine causes  $\text{Ca}^{2+}$  entry via both a store-operated and a store-independent pathway in, 379
- Adrenal glomerulosa cells and in insulin producing cells, voltage dependent calcium channels in, 33
- Agonist-induced down-regulation of type 1 and type 3 inositol 1,4,5-trisphosphate receptors in A7r5 and DDT1 MF-2 smooth muscle cells, 11
- Airway epithelial cells (human), sphingosylphosphorylcholine and sphingosine-1-phosphate mobilize cytosolic calcium through different mechanisms in, 387
- An exocytotic mutant of *Paramecium caudatum*: membrane fusion without secretory contents release, 349
- Antibodies (sequence-specific) to connexins block intercellular calcium signaling through gap junctions, 1
- Antitumor phospholipids, opposite effects on cytosolic  $\text{Ca}^{2+}$  of, by induction of calcium influx and activation of endoplasmic reticulum  $\text{Ca}^{2+}$ -ATPase, 241
- Apoptosis (neuronal): calcium, free radicals and excitotoxins in (invited review), 165
- Apoptosis in vitro: TPEN, a  $\text{Zn}^{2+}/\text{Fe}^{2+}$  chelator with low affinity for  $\text{Ca}^{2+}$ , inhibits lamin assembly, destabilizes nuclear architecture and may independently protect nuclei from (invited review), 151
- Apoptosis, role of calcium in (invited review), 173
- Astrocytes, images of  $\text{Ca}^{2+}$  flux in: evidence for spatially distinct sites of  $\text{Ca}^{2+}$  release and uptake, 423

## C

- Calcium in activity-dependent neuronal gene regulation, role of (invited review), 143
- $\text{Ca}^{2+}$ -ATPase (ER), opposite effects on cytosolic  $\text{Ca}^{2+}$  of antitumor phospholipids by induction of calcium influx and activation of, 241
- $\text{Ca}^{2+}$  binding (luminal), modelling of some potential effects of, on the kinetics of  $\text{Ca}^{2+}$  release from the endoplasmic reticulum, 261
- $\text{Ca}^{2+}$  binding (passive) in ventricular myocardium of neonatal and adult rats, 433
- $\text{Ca}^{2+}$ /calmodulin-dependent protein kinases within the nucleus, role of (invited review), 103
- Calcium in cardiac myocytes, confocal near-membrane detection of, 269
- Calcium channels in rat submandibular ductal cells, differential sensitivity to nickel and SK&F96365 of second messenger-operated and receptor-operated, 395

- $\text{Ca}^{2+}$  channel, stochastic simulation of a single inositol 1,4,5-trisphosphate-sensitive, reveals repetitive openings during 'blip-like'  $\text{Ca}^{2+}$  transients, 291
- Calcium channels (voltage dependent) in adrenal glomerulosa cells and in insulin producing cells, 33
- Calcium content of internal stores, a fluorometric method for estimating the, 251
- Calcium (cytosolic free), growth hormone-releasing factor mobilizes, through different mechanisms in two somatotrope subpopulations from porcine pituitary, 207
- $\text{Ca}^{2+}$ -dependent nitric oxide generation in rabbit parotid acinar cells, cGMP production is coupled to, 405
- $\text{Ca}^{2+}$  entry (capacitative) into *Xenopus* oocytes is sensitive to  $\omega$ -conotoxins GVIA, MVIIA and MVIIC, 229
- $\text{Ca}^{2+}$  entry in Jurkat T cells, calmodulin regulation of, 361
- Calcium entry pathways in secretory cells of the blowfly salivary gland, calcium store depletion activates two distinct, 53
- Calcium flux modulation: heterotrimeric G<sub>i</sub> protein is associated with the inositol 1,4,5-trisphosphate receptor complex and, 281
- Calcium, free radicals and excitotoxins in neuronal apoptosis (invited review), 165
- $\text{Ca}^{2+}$ -imaging, mapping of a carboxyl-terminal active site of parathyroid hormone by, 413
- Calcium, multiple mechanisms of regulation of the inositol 1,4,5-trisphosphate receptor by, 339
- Calcium, protease action, and the regulation of the cell cycle (invited review), 123
- Calcium regulation of basic helix-loop-helix transcription factors (invited review), 135
- Calcium regulation of nuclear pore permeability (invited review), 91
- $\text{Ca}^{2+}$  release and uptake, evidence for spatially distinct sites of, from images of  $\text{Ca}^{2+}$  flux in astrocytes, 423
- $\text{Ca}^{2+}$  release channel-dependent  $\text{Ca}^{2+}$  signalling, inositol 1,4,5-trisphosphate- and ryanodine-sensitive, in rat portal vein myocytes, 303
- Calcium release (quantal) from intracellular calcium stores, kinetic basis of, 43
- Calcium, role of, in apoptosis (invited review), 173
- Calcium signaling (intercellular) through gap junctions, sequence-specific antibodies to connexins block, 1
- Calcium signals (Fura-2) in skeletal muscle fibres loaded with high concentrations of EGTA, 23
- Calcium store depletion activates two distinct calcium entry pathways in secretory cells of the blowfly salivary gland, 53
- Calcium store in the nuclear envelope (invited review), 87
- Calcium stores, kinetic basis of quantal calcium release from intracellular, 43
- $\text{Ca}^{2+}$  transients ('blip-like'), stochastic simulation of a single inositol 1,4,5-trisphosphate-sensitive  $\text{Ca}^{2+}$  channel reveals repetitive openings during, 291
- Calcium uptake by heart cells: I. Ca uptake by the sarcoplasmic reticulum of intact heart cells in suspension, 181
- Calcium uptake by heart cells: II. Most entering Ca appears to leave without mixing with the sarcoplasmic reticulum Ca pool, 199

- Calmodulin/ $\text{Ca}^{2+}$ -dependent protein kinases within the nucleus, role of (invited review), 103
- Calmodulin gene (human CALM2), characterization of the, and comparison of the transcriptional activity of CALM1, CALM2 and CALM3, 323
- Calmodulin, new nuclear functions for (invited review), 115
- Calmodulin regulation of  $\text{Ca}^{2+}$  entry in Jurkat T cells, 361
- Capacitative  $\text{Ca}^{2+}$  entry into *Xenopus* oocytes is sensitive to  $\omega$ -conotoxins GVIA, MVIIA and MVIIC, 229
- Carboxyl-terminal active site, mapping of a, of parathyroid hormone by calcium-imaging, 413
- Cardiac myocytes, confocal near-membrane detection of calcium in, 269
- Cell cycle: calcium, protease action, and the regulation of the (invited review), 123
- cGMP production is coupled to  $\text{Ca}^{2+}$ -dependent nitric oxide generation in rabbit parotid acinar cells, 405
- Characterization of the human CALM2 calmodulin gene and comparison of the transcriptional activity of CALM1, CALM2 and CALM3, 323
- Confocal near-membrane detection of calcium in cardiac myocytes, 269
- Connexins, sequence-specific antibodies, to block intercellular calcium signaling through gap junctions, 1
- $\omega$ -Conotoxins GVIA, MVIIA and MVIIC: Capacitative  $\text{Ca}^{2+}$  entry into *Xenopus* oocytes is sensitive to, 229
- Current evidence suggests independent regulation of nuclear calcium (invited review), 79
- Cytoplasmic free  $\text{Ca}^{2+}$  increments (rapid micromolar) in a single smooth muscle cell, use of Indo-1FF for measurements of, 313
- Cytosolic calcium mobilized by sphingosylphosphorylcholine and sphingosine-1-phosphate through different mechanisms in human airway epithelial cells, 387
- Cytosolic free  $\text{Ca}^{2+}$  concentration increase in porcine somatotropes due to pituitary adenylate cyclase-activating polypeptides 38 and 27 through common and distinct mechanisms, 369
- D**
- DDT1 MF-2 and A7r5 smooth muscle cells, agonist-induced down-regulation of type 1 and type 3 inositol 1,4,5-trisphosphate receptors in, 11
- Differential sensitivity to nickel and SK&F96365 of second messenger-operated and receptor-operated calcium channels in rat submandibular ductal cells, 395
- Drosophila* TRPL channels, thapsigargin and receptor-mediated activation of, stably expressed in a *Drosophila* S2 cell line, 219
- E**
- EGTA (high concentrations of), Fura-2 calcium signals in skeletal muscle fibres loaded with, 23
- Endoplasmic reticulum  $\text{Ca}^{2+}$ -ATPase, opposite effects on cytosolic  $\text{Ca}^{2+}$  of antitumor phospholipids by induction of calcium influx and activation of, 241
- Endoplasmic reticulum, modelling of some potential effects of luminal  $\text{Ca}^{2+}$  binding on the kinetics of  $\text{Ca}^{2+}$  release from the, 261
- Excitotoxins, calcium, and free radicals in neuronal apoptosis (invited review), 165
- Exocytotic mutant of *Paramecium caudatum*: membrane fusion without secretory contents release, 349
- F**
- $\text{Fe}^{2+}/\text{Zn}^{2+}$  chelator (TPEN) with low affinity for  $\text{Ca}^{2+}$ , inhibits lamin assembly, destabilizes nuclear architecture and may independently protect nuclei from apoptosis in vitro (invited review), 151
- Fluorometric method for estimating the calcium content of internal stores, 251
- Free radicals, calcium and excitotoxins in neuronal apoptosis (invited review), 165
- Fura-2 calcium signals in skeletal muscle fibres loaded with high concentrations of EGTA, 23
- G**
- Gap junctions, sequence-specific antibodies to connexins block intercellular calcium signaling through, 1
- Gene (neuronal) regulation, role of calcium in activity-dependent (invited review), 143
- Gene expression, mechanisms controlling, by nuclear calcium signals (invited review), 131
- G<sub>i</sub> protein (heterotrimeric) is associated with the inositol 1,4,5-trisphosphate receptor complex and modulates calcium flux, 281
- Growth hormone-releasing factor mobilizes cytosolic free calcium through different mechanisms in two somatotrope subpopulations from porcine pituitary, 207
- H**
- Heart cells, Ca uptake by, 181, 199
- Helix-loop-helix transcription factors, calcium regulation of basic (invited review), 135
- Heterotrimeric G<sub>i</sub> protein is associated with the inositol 1,4,5-trisphosphate receptor complex and modulates calcium flux, 281
- Histamine causes  $\text{Ca}^{2+}$  entry via both a store-operated and a store-independent pathway in bovine adrenal chromaffin cells, 379
- Histamine causes  $\text{Ca}^{2+}$  entry via both a store-operated and a store-independent pathway in bovine adrenal chromaffin cells, 379
- Hypothesis: Does a decrease in subplasmalemmal  $\text{Ca}^{2+}$  explain how store-operated  $\text{Ca}^{2+}$  channels are opened? 65
- I**
- Images of  $\text{Ca}^{2+}$  flux in astrocytes: evidence for spatially distinct sites of  $\text{Ca}^{2+}$  release and uptake, 423
- Indo-1FF, use of, for measurements of rapid micromolar cytoplasmic free  $\text{Ca}^{2+}$  increments in a single smooth muscle cell, 313
- Inositol 1,4,5-trisphosphate receptor by calcium, multiple mechanisms of regulation of the, 339
- Inositol 1,4,5-trisphosphate receptor complex, heterotrimeric G<sub>i</sub> protein is associated with the, and modulates calcium flux, 281
- Inositol 1,4,5-trisphosphate receptors, agonist-induced down-regulation of type 1 and type 3, in A7r5 and DDT1 MF-2 smooth muscle cells, 11
- Inositol 1,4,5-trisphosphate- and ryanodine-sensitive  $\text{Ca}^{2+}$  release channel-dependent  $\text{Ca}^{2+}$  signalling in rat portal vein myocytes, 303
- Inositol 1,4,5-trisphosphate-sensitive  $\text{Ca}^{2+}$  channel, stochastic simulation of a single, reveals repetitive openings during

- 'blip-like'  $\text{Ca}^{2+}$  transients, 291  
 Insulin producing cells and in adrenal glomerulosa cells,  
 voltage dependent calcium channels in, 33

**J**

- Jurkat T cells, calmodulin regulation of  $\text{Ca}^{2+}$  entry in, 361

**K**

- Kinetic basis of quantal calcium release from intracellular  
 calcium stores, 43

**L**

- Lamin assembly inhibition, nuclear architecture destabilization  
 and protection of nuclei from apoptosis in vitro by TPEN, a  
 $\text{Zn}^{2+}/\text{Fe}^{2+}$  chelator with low affinity for  $\text{Ca}^{2+}$  (invited review),  
 151

**M**

- Mapping of a carboxyl-terminal active site of parathyroid  
 hormone by calcium-imaging, 413  
 Mechanisms controlling gene expression by nuclear calcium  
 signals (invited review), 131  
 Membrane fusion without secretory contents release: an  
 exocytotic mutant of *Paramecium caudatum*, 349  
 Modelling of some potential effects of luminal  $\text{Ca}^{2+}$  binding on  
 the kinetics of  $\text{Ca}^{2+}$  release from the endoplasmic reticulum,  
 261  
 Multiple mechanisms of regulation of the inositol 1,4,5-  
 trisphosphate receptor by calcium, 339  
 Myocardium (ventricular) of neonatal and adult rats, passive  
 $\text{Ca}^{2+}$  binding in, 433

**N**

- Neuronal gene regulation, role of calcium in activity-dependent  
 (invited review), 143  
 New nuclear functions for calmodulin (invited review), 115  
 Nickel and SK&F96365, differential sensitivity to, of second  
 messenger-operated and receptor-operated calcium  
 channels in rat submandibular ductal cells, 395  
 Nitric oxide ( $\text{Ca}^{2+}$ -dependent) generation in rabbit parotid  
 acinar cells, cGMP production is coupled to, 405  
 Nuclear architecture destabilization, lamin assembly inhibition, and  
 protection of nuclei from apoptosis in vitro by TPEN, a  $\text{Zn}^{2+}/\text{Fe}^{2+}$   
 chelator with low affinity for  $\text{Ca}^{2+}$  (invited review), 151  
 Nuclear calcium signals, mechanisms controlling gene  
 expression by (invited review), 131  
 Nuclear calcium: current evidence suggests independent  
 regulation of (invited review), 79  
 Nuclear calcium: regulation and functions (Special Issue),  
 77-180  
 Nuclear envelope, calcium store in the (invited review), 87  
 Nuclear functions (new) for calmodulin (invited review), 115  
 Nuclear pore permeability, calcium regulation of (invited  
 review), 91  
 Nucleus, role of  $\text{Ca}^{2+}$ /calmodulin-dependent protein kinases  
 within the (invited review), 103

**O**

- Opposite effects on cytosolic  $\text{Ca}^{2+}$  of antitumor phospholipids

- by induction of calcium influx and activation of  
 endoplasmic reticulum  $\text{Ca}^{2+}$ -ATPase, 241

**P**

- Paramecium caudatum*, an exocytotic mutant of: membrane  
 fusion without secretory contents release, 349  
 Passive  $\text{Ca}^{2+}$  binding in ventricular myocardium of neonatal  
 and adult rats, 433  
 Phospholipids (antitumor), opposite effects on cytosolic  $\text{Ca}^{2+}$  of,  
 by induction of calcium influx and activation of  
 endoplasmic reticulum  $\text{Ca}^{2+}$ -ATPase, 241  
 Pituitary (porcine) two somatotrope subpopulations from,  
 growth hormone-releasing factor mobilizes cytosolic free  
 calcium through different mechanisms in, 207  
 Pituitary adenylate cyclase-activating polypeptides 38 and 27  
 increase cytosolic free  $\text{Ca}^{2+}$  concentration in porcine  
 somatotropes through common and distinct mechanisms,  
 369  
 Portal vein myocytes, inositol 1,4,5-trisphosphate- and  
 ryanodine-sensitive  $\text{Ca}^{2+}$  release channel-dependent  $\text{Ca}^{2+}$   
 signalling in, 303  
 Protease action, calcium, and the regulation of the cell cycle  
 (invited review), 123

**R**

- Receptor-mediated and thapsigargin activation of *Drosophila*  
 TRPL channels stably expressed in a *Drosophila* S2 cell line,  
 219  
 Receptor-operated and second messenger-operated calcium  
 channels in rat submandibular ductal cells, differential  
 sensitivity to nickel and SK&F96365 of, 395  
 Role of  $\text{Ca}^{2+}$ /calmodulin-dependent protein kinases within the  
 nucleus (invited review), 103  
 Role of calcium in activity-dependent neuronal gene regulation  
 (invited review), 143  
 Role of calcium in apoptosis (invited review), 173  
 Ryanodine- and inositol 1,4,5-trisphosphate-sensitive  $\text{Ca}^{2+}$   
 release channel-dependent  $\text{Ca}^{2+}$  signalling in rat portal vein  
 myocytes, 303

**S**

- Sarcoplasmic reticulum of intact heart cells in suspension, Ca  
 uptake by the, 181, 199  
 Second messenger-operated and receptor-operated calcium  
 channels in rat submandibular ductal cells, differential  
 sensitivity to nickel and SK&F96365 of, 395  
 Secretory cells of the blowfly salivary gland in, calcium store  
 depletion activates two distinct calcium entry pathways,  
 53  
 Sequence-specific antibodies to connexins block intercellular  
 calcium signaling through gap junctions, 1  
 SK&F96365 and nickel, differential sensitivity to, of second  
 messenger-operated and receptor-operated calcium  
 channels in rat submandibular ductal cells, 395  
 Skeletal muscle fibres loaded with high concentrations of EGTA,  
 Fura-2 calcium signals in, 23  
 Smooth muscle cell (single), use of Indo-1FF for measurements of  
 rapid micromolar cytoplasmic free  $\text{Ca}^{2+}$  increments in, 313  
 Smooth muscle cells (A7r5 and DDT1 MF-2), agonist-induced  
 down-regulation of type 1 and type 3 inositol 1,4,5-  
 trisphosphate receptors in, 11

Somatotropes (porcine), pituitary adenylate cyclase-activating polypeptides 38 and 27 increase cytosolic free  $\text{Ca}^{2+}$  concentration in porcine somatotropes through common and distinct mechanisms, 369

Sphingosylphosphorylcholine and sphingosine-1-phosphate mobilize cytosolic calcium through different mechanisms in human airway epithelial cells, 387

Stochastic simulation of a single inositol 1,4,5-trisphosphate-sensitive  $\text{Ca}^{2+}$  channel reveals repetitive openings during 'blip-like'  $\text{Ca}^{2+}$  transients, 291

Store-operated and a store-independent pathways in bovine adrenal chromaffin cells, histamine causes  $\text{Ca}^{2+}$  entry via both, 379

Store-operated  $\text{Ca}^{2+}$  channels (hypothesis): Does a decrease in subplasmalemmal  $\text{Ca}^{2+}$  explain how they are opened? 65

Subplasmalemmal  $\text{Ca}^{2+}$  (does a decrease in) explain how store-operated  $\text{Ca}^{2+}$  channels are opened? 65

## T

Thapsigargin and receptor-mediated activation of *Drosophila* TRPL channels stably expressed in a *Drosophila* S2 cell line, 219

TPEN, a  $\text{Zn}^{2+}/\text{Fe}^{2+}$  chelator with low affinity for  $\text{Ca}^{2+}$ , inhibits lamin assembly, destabilizes nuclear architecture and may independently protect nuclei from apoptosis in vitro (invited review), 151

Transcription factors, calcium regulation of basic helix-loop-helix (invited review), 135

Transcriptional activity of CALM1, CALM2 and CALM3, characterization of the human CALM2 calmodulin gene and comparison of the, 323

## U

Use of Indo-1FF for measurements of rapid micromolar cytoplasmic free  $\text{Ca}^{2+}$  increments in a single smooth muscle cell, 313

## V

Ventricular myocardium of neonatal and adult rats, passive  $\text{Ca}^{2+}$  binding in, 433

Voltage dependent calcium channels in adrenal glomerulosa cells and in insulin producing cells, 33

## X

*Xenopus* oocytes: capacitative  $\text{Ca}^{2+}$  entry into *Xenopus* oocytes is sensitive to w-conotoxins GVIA, MVIIA and MVIIC, 229

## Z

$\text{Zn}^{2+}/\text{Fe}^{2+}$  chelator (TPEN) with low affinity for  $\text{Ca}^{2+}$ , inhibits lamin assembly, destabilizes nuclear architecture and may independently protect nuclei from apoptosis in vitro (invited review), 151
